about

I am a software engineer with ~8 years of experience building products across different tech stacks. I actually started out in graphic design and UI, focusing on UX, but eventually made the leap into coding.
Since then, I've worked on both frontend and backend projects, designing, building, and maintaining a variety of tech products, especially in fintech. I'm all about end-to-end involvement—from brainstorming and writing code to QA testing. I enjoy leading teams, building strong relationships across functions, and shaping the product roadmap. But my real passion is being hands-on where I can dig into the code.

Want to know more about me and my work style? Feel free to check out this link.
